SUPPLEMENT TO REPORT NO.

The Franc Leskosek Factory manufactures various steel products such as: cranes, high pressure pipes, steel pipes conducting air into blast furnaces, iron-connecting devices, and various hydro-electric plant implements including trellises, sluices, and grates for water cleaning.

- 2. This factory receives its steel from the Jesenice Gustanj steel plant and some materials from the Donawitz plant, near Kapfenberg, Austria. The products of the enterprise go mainly to the Trbovlje coal mine, the Litija lead mine, the Gustanj steel plant, and various hydro-electric plants which are now being constructed. Because the construction of the Fuzenica hydro-electric plant on the Drava River is being accelerated, 16 different sluices, up to 30 tons each, are being manufactured.
- 3. The director of the factory is Joze Senk, who until February 1950 was Assistant Director of Listostroj. The chief of the construction bureau of the factory is Engineer Otwar Jaklic. The political commissar is Franje Oblak; the UDB representative is Rudolf Vizjak; and the representative of the syndicate is Bogomil Jurisevic.
